## SEED CERTIFICATION IN PRINCE EDWARD ISLAND

Certification of seed potatoes in Prince Edward Island, as in all provinces of Canada, is carried out by the Canadian Food Inspection Agency (CFIA) under the authority of Part II of the Regulations to the *Seeds Act*.

Field grown seed potatoes are produced in Canada in seven classes as indicated in Table 1. When seed of one class is planted, it automatically produces seed of the next lower class when harvested, provided it meets the inspection standards of that class. This “flush through” system of production ensures seed of the highest performance in all classes. Under the *Plant Health Act*, Foundation Class is the lowest seed class that can be used for planting in Prince Edward Island.

Canada operates under a single federally run seed certification agency and a single system of class names and class standards that apply in all provinces. The United States, having individual State certification agencies, utilize a number of seed class designations varying from State to State. In Canada, seed classes within the classification system are based on both generation and disease level. The generation level depends entirely on the number of years planted in the field. Table 2 provides a useful means of comparing the various certification systems.

**Table 1**  
**CANADIAN SEED POTATO FIELD CERTIFICATION PROGRAM**  
**Maximum Tolerance of Final Inspection**

Seed Class	Inspections	Total Viruses (%)	Total Black Leg & Wilts (%)	Total Varietal Mix (%)
Pre-Elite (PE)	2	0	0	0
Elite I (E1)	2	0	0.1	0
Elite II (E2)	2	0.1	0.2	0
Elite III (E3)	2	0.2	0.3	0.05
Elite IV (E4)	2	0.3	0.5	0.1
Foundation (F)	2	0.5	1.0	0.2
Certified (C)	2	2.0	2.0	0.5

<sup>1</sup> PE class seed must be produced in land being cropped in a three year crop rotation.

<sup>2</sup> All seed classes do have zero tolerance for Potato Spindle Tuber Viroid and Bacterial Ring Rot.

Abbreviations Used: G = Generation, E = Elite, N = Nuclear, PE = Pre-Elite,  
F = Foundation, C = Certified

The purpose of this table is to express equivalency of terms used by various certification agencies for seed potatoes harvested from a series of successive field plantings. For specific criteria relating to disease tolerances and other requirements, the reader is referred to the certification regulations of the agency in question.

\*Source: Certification Section, Potato Association of America. *Revision Date 12/2020*

\*\*Notes:

- Idaho, Maine, Michigan, Nebraska/Wyoming, North Dakota and Oregon's designation of FY = Field year.
- Wisconsin designation of FY = Foundation Year.
- New York lots originate at Cornell-Uihlein Farm, the first three generations (G1-G3) are also designated by a (U) to denote source.
- The first field planting utilizes laboratory-tested stocks which may be tissue-cultured plantlets, greenhouse-produced minitubers, stem cuttings, or line selections. Contact agencies for details as to types of stocks planted in their programs.

## SEED PRODUCTION IN PRINCE EDWARD ISLAND

Quality Prince Edward Island seed potatoes originate at a number of private seed operations across the Island including the Fox Island Elite Seed Farm, owned and operated by the Prince Edward Island Potato Board. The production of Plantlets and/or Nuclear seed at these sites is carefully monitored by the Canadian Food Inspection Agency. Progeny from the Nuclear production units becomes the base for the entire seed system. Seed in the Pre-Elite, E1, E2, E3, E4, F and C classes is produced by Island seed growers and marketed by licensed dealers and exporters.

Traditionally Prince Edward Island exports seed potatoes to approximately ten countries annually. Wide selections of public and private potato varieties are available.

The amendments to the *Plant Breeders' Act* in Canada came into force on February 27, 2015 and included provisions that bring it into line with the 1991 Act of the International Convention for the Protection of New Varieties of Plants (UPOV 91).

Additional information on Prince Edward Island seed potato production is available from:

## **DISEASE CONTROL IN PRINCE EDWARD ISLAND**

The Province of Prince Edward Island introduced a mandatory Post-harvest Laboratory Virus Testing Program in 1998. This program requires that all seedlots intended for planting on PEI be tested for Potato Virus Y (PVY) and Potato Leafroll Virus (PLRV). Samples must be collected or supervised by an inspector appointed by the Department of Agriculture and Land (PEIDAF) or the Canadian Food Inspection Agency (CFIA). Testing must be carried out in a CFIA accredited laboratory. A seedlot that exceeds the virus levels contained in the *Plant Health Act*, Potato Regulations is not eligible for planting on PEI.

Additional information on disease control in Prince Edward Island is available from:

## **CFIA ACCREDITED DISEASE TESTING LABORATORY**

In Prince Edward Island, regulatory disease testing required by CFIA is conducted by private laboratories accredited by the Canadian Food Inspection Agency. The following laboratory on PEI is approved by CFIA for regulatory CFIA inspection requirements.

### Note:

This Booklet reflects information available as of **November 14, 2022**. This Booklet includes only the production information authorized by growers for release in the publication on registered varieties. It is not a comprehensive listing of all seed potatoes produced in Prince Edward Island.

## **PLEASE NOTE:**

In the following pages, (\*) identifies a non-registered potato variety under the *Seeds Act* that can only be multiplied further for experimental, variety registration or export purposes. In addition, it can only be moved as certified seed potatoes between farm units in Canada if accompanied by a Certificate of Authorization.
